자기소개서

Personal statement/自我介绍

1. 자기소개에 도움이 될 만한 사항을 구체적으로 쓰십시오(가정환경, 성장과정, 학교 및 지역환경 등).

Write your personal information that you want to be considered as part of your admission application. You might include exceptional hardships, challenges, or opportunities that have shaped or impacted your life, and your personal and educational environment.

Thanks for allowing me to write a few words about myself. Well, I have been leading a very simple life since my childhood. The five members of my family, are my parents, elder brother, elder sister, and I. My family member is all highly educated. I was grown up in a small green and riverside village, which is not so far away from the capital city of Bangladesh, this village is a peaceful and spiritual place that gives me to grow up properly as a human being. I started my primary school education in my village at St. Dominic Savio School and have completed successfully my elementary school with a good result that opportunities give me a chance to be admitted to a recognized school and college. The name of the school is Bandura Holy Cross High School and College. This institution provides a versatile activity to teach me how to take challenges to make me an industrious person and that motivation helps me to complete successfully my secondary and higher secondary degrees. There is SSC (Secondary School Certificate) with a scoring GPA of 3.22 out of 5.00 from Business Studies in 2015. In 2018, I was admitted to Bandura Holy Cross School & College for completing my high school education, HSC (Higher Secondary School Certificate), in Business Studies, and graduated successfully scoring a GPA of 3.24 out of 5.00. However, my final destination is to be a technology entrepreneur. In the course of my SSC and HSC programs, I study some courses related to that goal. I studied Technology and Business including courses like English, Entrepreneurship, Accounting, Management, Marketing, Computer Studies, and Mathematics where each of the courses I got the good academic achievement.

For this reason, after completing my Secondary and higher Secondary degree I plan to pursue my Bachelor's degree abroad to improve my knowledge and ability as well as to strengthen my character, which is why I decided to learn more about Computer Information and Telecommunication Engineering. The program will not only teach theoretical knowledge but more than that, there is practical knowledge in the fields of Computer Information and Telecommunication Engineering is based.

2. 우리 대학에 지원한 학과를 희망하는 이유, 입학 후 자기계발 및 학업 계획, 졸업 후의 자신의 진로계획에 대해 쓰십시오.

What motivated you to apply to Kyungmin University? Explain why you are applying to the particular school of study (department) and what is your plan of study and self-development after admission and your career goal after graduation.

This is surely a wonderful question - why I am applying and what my ultimate goal is. Well, 'The Computer Information and Telecommunication Engineering' which I have chosen to study is not being widely offered by the universities in Bangladesh, and being at Kyungmin University means it will better enhance my technological knowledge and educational skills which are the main focus of my course of Computer Information and Telecommunication Engineering and better polish my skills in the most competitive, creative and practical environment. There is a wide mixture of cultures at this university, and there are a lot of foreign students from most parts of the world including a few Bangladeshi students, which means that I can learn how to lead, live and compete in this diverse university. At Kyungmin University there is freedom and challenges, students usually feel free to express their own opinions and to do what they want legally. There is a creative environment; individual ideas are encouraged to lead and perform well in the front.

Being a private university, certainly, the university has one of the most experienced and qualified faculty members who have outstanding educational qualifications. Most of the professors are associated with foreign universities and hold at least an honourable Ph.D. degree that's helped me to know many things from their lectures and experiences. It has a big library, which is facilitated with a lot of old, and modern, national and international famous books and research works. It has a renowned research lab and Internet access facilities that help to get into the vast ocean of knowledge to enrich myself. These facilities will help me to research the fields – how to promote the manpower of an organic organization deal with the employees and workers, how to improve manpower and skill, how to make a better plan, how to bring out maximum the output from a person, how to recruit better employees and workers, how to save a company from upcoming threat and so on.

Gyeonggi-do is one of the safest, most developed, and most dynamic cities in South Korea, which provides all the modern facilities to the foreigners, and this city is famous for a good education as well. The Korean educational system has a good reputation, and Kyungmin University follows the same way to retain their all over the world as well. Accredited qualifications obtained from Kyungmin University business school are recognized in most parts of the world. There are courses in a wide variety of subjects, including many which are open to international students, which compel me to choose to study here. There is a wide variety of food available (both traditional Korean food and international cuisine), especially in the bigger cities like Gyeonggi-do, which means I can get what I want.

Studying at Kyungmin University will help me to build skills such as creative thinking, the ability to work on my initiative and strong teamwork with fellow students, and communication skills. Kyungmin University degrees are highly regarded by employers as they have a strong emphasis on practical experience whether this is in research projects or case studies. Furthermore, admission into Kyungmin University is competitive and class sizes are restricted to ensure that all students have sufficient access to equipment that leads to better graduate outcomes.

In the end, my ultimate goal is to become a very good techno entrepreneur professional such as a business or innovative new start-up and introduce new technology in my home country to many populations. So, I hope the Engineering school will allow me so I could continue my study in such a wonderful university and to accomplish my dreams. For these reasons I have chosen Kyungmin University Engineering School because it fulfils all of my requirements and I am also fulfilling its entire minimum requirement for admission.

Though my future goal is to be a techno entrepreneur professional, I should have some professional training and experience. Therefore, I will look for an internship under any reputed organization for a half-month or a year after my bachelor's degree. In my Secondary and higher secondary, I gained a sound knowledge of programming and the software industry. After completing an internship, I will search for a good job in the same sector if I can show a better application of knowledge and skills in my working field that I have earned and will earn in my completely educational life. I will also have to make sure that I can earn one or more honorable degrees in the field of AI (artificial intelligence) such as a master's degree. Later on, that will help me to reach my goal.

3. 한국어 능력 성적과 어학 관련 교육을 받은 경험을 자세하게 기술하세요.

Please briefly state your level of Korean language proficiency and your academic and extracurricular activities

한국어교육 이수현황 Korean Language Completion Status 韩国教育完成情况	연수기관	Training Institution/培训机构/
	연수기간	Period of Study / 学习期间 /
	수료성적	Score / 取得成绩 /

Apart from my studies, I love to learn a different language and culture that's why nowadays I am learning the Korean language to try to explore Korean culture. I can read and write the Korean alphabet and can speak more than a couple of languages. I speak Bangla (my Mother's tongue), English, and Hindi. These language skills will help me to communicate well and be successful in my career. It needs to mention that I am skilled in computer works such as Data Entry, MS Word PowerPoint, and Spread Sheet. These skills and degrees altogether with a good accomplishments in my student life.

In addition, I read good books, play cricket, take part in religion and business conferences, listen to BBC news, do

Rover scouting and go traveling. I also take part in volunteer activities such as blood donation, tree plantation, raising funds for poverty-stricken people, and taking part in the human rights campaign. I also love to go out for roaming with my friends and family on the weekends and so on. I have experienced participating in different social activities such as scouting, community policing, and social integration program.
